FULLSTACK DEVELOPER (MERN) | AI & DEVOPS LEARNER

Professional Summary

Recent BICT graduate specializing in Software Development with hands-on experience in building full-stack web applications using the MERN stack, PHP, and MySQL. Possesses foundational knowledge in AI, Machine Learning, and DevOps concepts, with a strong passion for modern software engineering and secure application development. A motivated and fast learning individual with strong problem solving and teamwork skills, currently seeking an internship opportunity to apply technical knowledge, gain industry experience, and contribute to real-world software development projects.

Education

University of Kelaniya

BICT (Hons) in Software Development

2023 - Present

Undergraduate

Current GPA: 3.17

Relevant Coursework:

Data Structures, Web Development, Database Systems, Software Engineering, Cyber Security, Networking, Mobile Application Development

Technical Skills

Programming Languages: JavaScript, PHP, Python, Kotlin, C

Frontend Development: React.js, HTML5, CSS3, Tailwind CSS

Backend Development: Node.js, Express.js, PHP

Databases: MongoDB, MySQL, Supabase

Tools & Technologies: GitHub, Docker, Figma

Core Competencies: Full-Stack Development, Responsive UI Design, Authentication & Authorization, Database Design, Team Collaboration, Problem Solving

Projects

Full-Stack E-Commerce Web Application:

Individual Project

- Designed and developed a modern full-stack e-commerce platform using the MERN stack with secure authentication and role-based access control for users and administrators.
- Implemented product management, order workflows, admin dashboards, chatbot support, and responsive UI components for enhanced user experience.
- Integrated Supabase for cloud image storage and EmailJS for automated email notifications.
- Deployed frontend and backend services separately using Vercel and Render to improve scalability and maintainability.
- Technologies:** MongoDB, Express.js, React.js, Node.js, Tailwind CSS, Supabase, EmailJS

Learning Institute Management System:

Group Project

- Developed a web-based management system for handling student records, courses, and institutional operations efficiently.
- Built backend functionalities using PHP and integrated MySQL databases for reliable data management.
- Designed dynamic frontend interfaces to improve usability and administrative workflows.
- Technologies:** PHP, MySQL, JavaScript, CSS

Library Management & Book Donation System:

Individual Project

- Built a secure web-based platform to automate library appointment scheduling and book donation management processes.
- Implemented multi-user authentication and role-based access control for administrators, librarians, and patrons.
- Developed real-time booking workflows, donation tracking, and administrative reporting features to reduce manual workload.
- Applied MVC architecture and integrated security measures against SQL injection, XSS, and CSRF vulnerabilities.
- Technologies:** PHP, MySQL, JavaScript, CSS

Achievements

- Presented the “Recycle Hub” sustainability platform at the **Faculty of Computing and Technology Students’ Research Symposium (FCTSRS) 2025** at the University of Kelaniya.
- Collaborated with a student team to showcase an innovative recycling and waste management solution focused on sustainability and community engagement.

Certifications

Diploma in Artificial Intelligence (Ongoing) <i>IBSC Campus</i>	2026 - Present
MERN Stack Development Course <i>SKYREC Academy</i>	2025 - 2026
CS50: Introduction to Programming with Python <i>HarvardX</i>	2026
CSS (Basic) <i>HackerRank</i>	2025
Git Training <i>Simplilearn SkillUp</i>	2025
IT Essentials <i>Cisco Networking Academy</i>	2025
Cybersecurity Awareness: Cybersecurity Terminology <i>LinkedIn Learning</i>	2024
Prompt Engineering for Everyone <i>IBM Cognitive Class</i>	2024
Diploma in Graphic Designing <i>Oslo Computer College</i>	2021

Soft Skills

- Teamwork and Collaboration
- Communication Skills (Sinhala/ English)
- Leadership and Problem Solving
- Adaptability and Continuous Learning
- Creative and Innovative Thinking
- Time Management and Responsibility

Extracurricular Activities

- Member of Legion Club Rookie Squad (2021 - 2022).
- Member of the Free and Open Source Software (FOSS) Community.
- Actively engaged in collaborative software development and knowledge gaining activities related to modern web technologies and open source tools as a member.
