FULL-STACK DEVELOPER | AI/ML & DEVOPS LEARNER

Professional Summary

Recent BICT graduate specializing in Software Development with hands-on experience in building full-stack web applications using the **MERN stack**, **PHP**, and **MySQL**. To continuously elevate my skill set, I am currently expanding my expertise into **basic QA** methodologies and the **basics of DevOps** practices. A motivated and fast-learning individual with strong problem-solving and teamwork skills, currently seeking an internship opportunity to apply technical knowledge, gain industry experience, and contribute to real-world software development projects.

Education

University of Kelaniya, Faculty of Computing and Technology (FCT)

BICT (Hons) in Software Development

Expected Graduation: June 2027

2023 - Present

Undergraduate

Relevant Coursework:

Data Structures, OOP in Java, Web Development, Database Systems, Software Engineering, Cyber Security, System and Network Laboratory, Mobile Application Development (Basics), Advanced Database (Oracle DB).

Technical Skills

Programming Languages: JavaScript, PHP, Python, Kotlin, C

Frontend Development: React.js, HTML5, CSS3, Tailwind CSS

Backend Development: Node.js, Express.js, PHP

Databases: MongoDB, MySQL, Supabase

Tools & Technologies: GitHub, Docker, Figma, Postman, VS Code, IntelliJ, Packet Tracer, Oracle DB 21c

Core Competencies: Full-Stack Development, Responsive UI Design, Authentication & Authorization, Database Design, Team Collaboration, Problem Solving

Projects

CLINEXA - Hospital Appointment Management System: [Project Repo](#) | [Live Demo](#)

Group Project (Architecture Designer and Main Developer) (Jun 2026 - Jul 2026)

- Served as the Main Developer in a team project, leading the design and implementation of a full-stack hospital appointment management system with secure portals for Administrators, Doctors, and Patients.
- Designed the system architecture and PostgreSQL database schema, implemented Supabase Authentication with role-based access control, and integrated Google OAuth and secure session management.
- Developed the Home, About, and Contact pages, designed the UI prototypes in Figma, integrated core system modules, and coordinated the integration of team-developed features into a unified application.
- Implemented responsive dashboards, appointment scheduling, doctor and patient management, and optimized the application for deployment using modern React.js development practices.
- Strengthened expertise in technical leadership, full-stack architecture, cloud database integration, authentication and authorization, collaborative Git workflows, UI/UX design, and deploying production-ready web applications.
- Technologies:** React.js, Vite, JavaScript, Tailwind CSS, Supabase, PostgreSQL, Google OAuth, EmailJS, React Router DOM, Git, GitHub, Figma, Vercel

Full-Stack E-Commerce Web Application: [Project Repo](#) - [Frontend](#) | [Backend](#) | [Live Demo](#)

Individual Project (Jan 2026 - Mar 2026)

- Developed a full-stack e-commerce web application using the MERN stack to strengthen practical knowledge in full-stack development and deployment.
- Implemented secure authentication and authorization with Admin/User role-based access control.
- Designed and developed product and user management functionalities with a responsive modern UI using Tailwind CSS.
- Integrated Supabase cloud storage for image management and optimized frontend/backend deployment using Vercel and Render.
- Gained hands-on experience in scalable backend architecture, REST API development, database integration, and production-style deployment.
- Technologies:** MongoDB, Express.js, React.js, Node.js, JavaScript, Tailwind CSS, Supabase, Vercel, Render

Library Management & Book Donation System: Project Repo

Individual Project (Nov 2025 - Dec 2025)

- Built a secure web-based platform to automate library appointment scheduling and book donation management processes.
- Implemented multi-user authentication and role-based access control for administrators, librarians, and patrons.
- Developed real-time booking workflows, donation tracking, and administrative reporting features to reduce manual workload.
- Applied MVC architecture and integrated security measures against SQL injection, and CSRF vulnerabilities.
- **Technologies:** PHP, MySQL, JavaScript, CSS

Achievements

- Presented the “Recycle Hub” sustainability platform at the **Faculty of Computing and Technology Students’ Research Symposium (FCTSRS) 2025** at the University of Kelaniya.
- Collaborated with a student team to showcase an innovative recycling and waste management solution focused on sustainability and community engagement.

Certifications

MERN Stack Development Course <i>SKYREC Academy</i>	Oct 2025 - Mar 2026
CS50: Introduction to Programming with Python <i>HarvardX</i>	Dec 2025 - Nov 2026
CSS (Basic) <i>HackerRank</i>	Sep 2025 - Oct 2025
IT Essentials <i>Cisco Networking Academy</i>	Jul 2025 - Jul 2025
Cybersecurity Awareness: Cybersecurity Terminology <i>LinkedIn Learning</i>	Nov 2024 - Nov 2024
Prompt Engineering for Everyone <i>IBM Cognitive Class</i>	Nov 2024 - Dec 2024
Diploma in Graphic Designing <i>Oslo Computer College</i>	Jan 2021 - Dec 2021

Soft Skills

- Leadership
- Teamwork
- Communication
- Problem Solving
- Adaptability
- Time Management

Extracurricular Activities

- Member of Legion Club Rookie Squad (Jun 2021 - Feb 2023).
- Member of the Free and Open Source Software (FOSS) Community.
- Actively engaged in collaborative software development and knowledge-gaining activities related to modern web technologies and open source tools as a member.
